* The Reflections Scattering and Garden urns are designed to break down in water. The timing to break down will vary based on water conditions and temperature. Thus, the urn must remain completely dry until it is placed in the water or buried for the scattering ceremony. Because of the delicate nature of the pressed cotton material, the urn also must be handled gently to prevent rips or tears. Do not ship cremated remains within this product. Cremated remains should be placed in the biodegradable bag.

† Floating times may vary. Square biodegradables do not float when placed in water.

Taking Care of Your Sterling Silver

As sterling silver is exposed to pollutants in the air, it becomes tarnished and loses its luster because of oxidation. By following a few guidelines, caring for sterling silver is simple and will add to its beauty and personal value.

1. Before each wearing, polish your sterling silver with a polishing cloth. Polishing cloths are treated with a special jeweler's rouge, which removes light tarnish and will not scratch your jewelry.
2. After each wearing, polish and store your sterling silver in an airtight compartment or plastic bag to minimize tarnishing.
3. Put your jewelry on last. Exposing your jewelry to hair spray, cosmetics and perfume can cause spots. Jewelry should be removed before swimming, showering and dishwashing, or when handling bleaches, alcohols and cleaners.

Detailed Trigard Ordering Instructions

STEP 1 – Select, scan and send a photo

Choosing a photo

When selecting a photo to be engraved, keep in mind some simple rules to guarantee the finest duplication possible. Though poor photos can be manipulated to some degree, the following rules will help you avoid unsatisfactory results.

1. Whenever possible, choose a photo that is sharp and in focus. Blurry or out-of-focus pictures will result in a poor reproduction.
2. Avoid washed-out photos with little or no contrast. Photos with high contrast will provide the best results.
3. Reproduction is done with digital technology, so digital files are preferred.

Tips for scanning photos

Correct scanning is key to the quality of your finished memorial. Read these tips before you start scanning.

1. Always scan the image in color mode. Color images will create more contrast than black-and-white images.
2. Crop out unnecessary areas of the photo to reduce your file size. This is especially recommended if you will be providing your photo via email.
3. Once the area of the photo you want is selected, you can adjust the size and the resolution of your photo. Select a resolution between 200 dpi and 300 dpi. A minimum size of 2" x 3" is sufficient, in either horizontal or vertical format.
4. If possible, save the photo as a .tif file. If saving in some other format, please call Batesville Customer Service to see which formats are acceptable.

Sending your scanned photo

Once your photo is scanned, you can send it in several different ways. To save time and expense, email is the preferred method. Batesville's e-mail address is Batesville.FDAC@Batesville.com. If you have questions, please call Batesville Customer Service.

STEP 2 – Select the product to attach the appliqué

Until Then

We've shared our lives these many years. You've
held my hand; you've held my heart. So many
blessings, so few tears — yet for a moment,
we must part. The memories you've given me
are times I've shared with my best friend.
I'll hold them, Love. Right here they'll be.
Until we share our lives again.

Footprints in the Sand

Lord, You said that once I decided to follow
You, we would walk side by side through life.
But when I needed You most, I saw only one set
of footprints in the sand. The Lord replied,
"I love you and I would never leave you. During
your times of trial and suffering, when you see
only one set of footprints, it was then that I
carried you."

Living Memorial®
PROGRAM

*“I will smile when I think of a small sapling growing tall
over the years to celebrate my husband’s life.”*

The significance of a unique life is symbolized with the planting of a tree

The Living Memorial Program is a unique and special way to honor the memory of a loved one. When you select a Batesville full size cremation urn, casket, container* or keepsake item, we arrange for a tree seedling to be planted in a national forest or woodland as a living tribute and memorial to the deceased. Established in 1976, the Living Memorial has helped to reforest thousands of acres of forests throughout the U.S., Canada, Australia, and the United Kingdom.

More than just a majestic memorial, these trees shelter wildlife, reduce water and wind erosion and contribute to the purity of the air we breathe, helping to improve the environment for generations to come. The Living Memorial is managed by Batesville in cooperation with the U.S. Forest Service, The Canadian Institute of Forestry and other international organizations. Tree species and planting locations are determined by these agencies, based on the greatest need in that region.
